

## Roof Sheathing Checklist

From inside your attic determine the following: (for guidance see: [Roof Sheathing Assessment](#))

Type of roof decking (sheathing)

- Planking
- Plywood
- Oriented Strand Board

Thickness of roof sheathing \_\_\_\_\_ inches

Type of roof decking fasteners

- Smooth Shank Nails
- Ring-Shank Nails
- Screws
- Staples

Length of fasteners \_\_\_\_\_ inches

Typical maximum fastener spacing (field of roof sheathing or planking – not along edge of panels) \_\_\_\_\_ inches

Note: If you get spacing of 3 to 6 inches between fasteners, go to the next rafter or truss and check the nail spacing along that member.
